Introducing RStudio Team

RStudio's recommended professional data science solutions for every team. RStudio Team includes:

RStudio Server Pro

Take control of your R code

An integrated development environment for R, with a console, syntax-highlighting editor that supports direct code execution, and tools for plotting, history, debugging and workspace management.

RStudio Connect

Connect data scientists with decision makers

Publish and distribute data products across your organization. One button deployment of Shiny applications, R Markdown reports, Jupyter Notebooks, and more.

RStudio Package Manager

Control and distribute packages

Collections of R functions, data, and compiled code in a well-defined format. You can expand the types of analyses you do by adding packages.

FEATURED CUSTOMER SPOTLIGHT

Increasing the Impact of Data at Stack Overflow

"We were spending too much time on the logistics of sharing our results," says Julia Silge, data scientist at Stack Overflow. "The workflow we had was not consistent or efficient."
